PROFESSIONAL SUMMARY

Data Engineer with 4 years' experience in the banking sector and M.Sc. in Artificial Intelligence. Strong knowledge in architecting, optimizing and maintaining scalable data pipelines using Python, Spark/PySpark and cloud tools - AWS EC2 and S3. Successfully partner with cross-functional teams in fast paced environments and translate complex requirements into reliable ETL workflows. Committed to ongoing technical advancement and professional growth to excel in delivering high-impact, data driven solutions. Currently working as an Order Preparation and Quality Assurance Associate while actively pursuing data engineering opportunities.

WORK HISTORY

Order Preparation and Quality Assurance Associate

02/2026 – Current

[Haywood Golf](#)

- Handle end-to-end preparation and quality assurance of 1200+ custom golf clubs per month in a fast-paced production environment, ensuring every order match customer specification before dispatch.
- Collaborate across build, inspection and dispatch teams to reduce bottlenecks during peak periods and improve process consistency.

Data Engineer

10/2021 - 8/2025

Bank of Ireland, On-site Contractor with [FDM Group](#) 08/2024 - 08/2025

- Principle within the initial squad tasked with driving cloud migration using AWS EC2 and S3 to provision and manage environments.
- Developed end-to-end data processing solutions using Spark, PySpark, HDFS and SQL.
- Direct and oversee migration of 1 billion records from data warehouse to data lake while maintaining full data integrity throughout.
- Manage code collaboration (Bitbucket) to address branch creation, pull-request reviews, and promotions from development to production environments.
- Provide support and mentorship for new hires on everything from code reviews and tooling usage, to stakeholder engagement and agile best practices.

Data Engineer

Citi Group, Belfast - Onsite contractor with [FDM Group](#) 01/2022 - 08/2024

- Develop robust data pipelines with diverse tech stack: Python, SpEL (Java), NoSQL (MongoDB), Postman, Jira, Confluence, and Athena.
- Code steward for a critical control leading its development and validating tests and liaising with the business to capture and implement evolving requirements.
- Co-developed Python scripts for controls, importers and subscribers reducing analysis times from ~ 2 hours to 45 minutes.
- Wrote and maintained Confluence how-to articles, supporting 25+ data engineers with accessible, up-to-date documentation, and onboarding new team members assisting with technical duties and operations.

EDUCATION

MSc. Artificial Intelligence 2020 – 2021 (University of Ulster)

BSc. Computing & IT 2017 – 2020 (Queen's University, Belfast)
